

Tarun Siva Krishna Yenduri

Machine Learning Engineer

Pedana, Andhra Pradesh, India | **+91 9392157226**

tarunyenduri12@gmail.com | [GitHub](#) | [LinkedIn](#) | [Google Skills](#)

Professional Summary

Machine Learning enthusiast specializing in building end-to-end predictive systems using **Python** and **Scikit-learn**. Experienced in developing ML pipelines, performing feature engineering, and deploying interactive applications using **Streamlit**. Focused on solving real-world problems through data-driven models and scalable ML workflows.

Technical Skills

- **Programming:** Python, **Java**
- **Machine Learning:** Scikit-learn, Model Evaluation, Feature Engineering
- **Data Analysis:** Pandas, NumPy
- **Tools & Frameworks:** Streamlit, Git, Jupyter Notebook
- **Domains:** Predictive Modeling, Classification Systems

Professional Experience

Machine Learning Intern | Enginow (Jan 2026 – Feb 2026)

- Developed ML tasks using Python, Pandas, NumPy, and Scikit-learn.
- Trained and evaluated machine learning models for predictive tasks.
- Conducted dataset analysis and experiments to integrate ML workflows into projects.

Key Projects

CrowdShield AI – Real-Time Crowd Risk Detection

- Developed an AI-driven system for real-time crowd monitoring and risk assessment.
- Implemented computer vision and ML algorithms to detect potential hazards in high-density environments.

Customer Churn Prediction System

- Built a machine learning classification system using Python, Pandas, and Scikit-learn.

- Implemented preprocessing, feature engineering, and model evaluation with an interactive Streamlit dashboard.

Scam Risk Analyzer

- Developed an ML tool to analyze and detect potential scam messages using text processing and classification.
- Built a user interface for real-time risk prediction.

AI-Powered Dropout Prediction & Counseling System

- Created a system to identify students at risk of dropping out using predictive models and academic data analysis.
- Proposed early intervention and counseling support based on risk levels.

Customer Purchase Prediction App

- Designed a predictive ML application to estimate purchase probability using customer behavior data.
- Implemented classification models and an interactive prediction interface.

Education

Bachelor of Technology: Artificial Intelligence & Machine Learning (2024 – 2028)

Seshadri Rao Gudlavalleru Engineering College.

Certifications

- [India AI Impact Summit Buildathon \(2025\).](#)
- [ATF 2025 - Stage 2 Candidate.](#)
- [Built& deploy apps with google ai studio](#)
- [Certification of completion python zero to hero in telugu](#)
